## . Health Officer's Report.

SAN FRANCISCO, July 1st, 1888.

To the Honorable the Board of Supervisors
Of the City and County of San Francisco:

Gentlemen: I have the honor to submit to you my report of the transactions of the Health Office for the year ending June 30th, 1888.

During the year the deaths in this city numbered 6,036 against 5,359 for the preceding year; of these 530 were Chinese, and 5,506 were of other nationalities.

I have estimated the population of this city at 330,000, which gives a death rate of 18.27 per 1,000 for the year, against 17.86 per 1,000 for the year preceding, when the population was estimated at 300,000.

Estimating the Chinese population at 30,000, the annual death rate among this people was 17.63 per 1,000

Estimating the population of other nationalities at 300,000, the death rate was 18.36 per 1,000.

The deaths from the principal Zymotic diseases were:

	YEAR ENDING JUNE 30, 1888.	YEAR ENDING JUNE 30, 1887.
Smallpox	67	
Diphtheria	151	247
Croup	90	77
Typhoid fever	152	145
Scarlatina	28	9
Cholera infantum	94	88
Cerebro-spinal meningitis	64	20
Other zymotic diseases	242	224
	588	\$10

	YEAR ENDING JUNE 30, 1888.	YEAR ENDING JUNE 30, 1887.
CONSTITUTIONAL DISEASES.		
Cancer	190	64
Phthisis pulmonalis	905	772
Other constitutional diseases	163	220
	1,258	1,056
LOCAL DISEASES.		
Eneephalitis and meningitis	165	129
Heart diseases	387	292
Apoplexy and paralysis	273	225
Diseases of the liver	114	84
Enteritis	180	123
Pneumonia	577	311
Bright's disease	132	55
Bronchitis	173	113
Other local diseases	916	811
	2,917	2,143
DEVELOPMENTAL DISEASES.		
Atrophy, inanition, old age	426	420
Other developmental diseases.	.1 78	154
	504	574
Violent deaths	296	272
Unascertained deaths.		504
Still-births		293

The number of births registered at the Health Office during the year was 1,780, against 1,346 of the preceding year; these figures are entirely out of proportion to the deaths, and would argue the extinction of the population of San Francisco in a few years if they were correct. The discrepancy is, however, caused by the neglect of physicians and others to register births as required by law.

At the time of my appointment as Health Officer, on January 23d last, smallpox was epidemic in this city. My predecessor, the late Dr. J. L. Meares, had commenced with great energy to combat the disease, and it was soon completely under control.

I consider that the infection was brought to this city by a Chinese passenger, who arrived on May 3d, 1887, by the steamship "City of Sydney," from Hongkong (the smallpox epidemic of 1876 commenced in the same manner on the arrival of Chinese passengers on the 19th of May.)

In the month of May eight cases were reported; during the months immediately following there was no great increase in the number of persons affected; in June 11 cases were reported, in July 9, in August, September and October 6 each month.

In August physicians were appointed to visit from house to house and persuade persons to be vaccinated.

In November the cases numbered 33. Every effort was made to induce people to be vaccinated; advertisements were inserted in the newspapers in different languages, calling attention to the imminent danger to which unvaccinated persons were liable, and house to house vaccination was energetically continued. The Health Officer was instructed to examine all children in the public schools to see if they were properly protected, and the medical officers attached to the various Public institutions were ordered to vaccinate the inmates and all arrivals.

On December 15th the Board of Health resolved to have the Chinese quarter thoroughly fumigated and the houses there examined for concealed smallpox cases. This was done under the superintendence of a medical officer assisted by a corps of Health Inspectors; all suspicious and filthy houses were cleaned and fumigated with chlorine gas; no resistance was, in any instance, offered, and the cleansing of this quarter was, undoubtedly, productive of great good.

A circular letter was sent to canners, manufacturers, mercantile firms and employers of labor, recommending vaccination

and offering to send physicians to their establishments to vaccinate their employees free of charge; this offer was very generally accepted and several thousand persons were vaccinated by these means.

In December there were 86 cases, and on December 29th the Board of Health declared smallpox to be epidemic. Physicians were appointed to vaccinate in all quarters of the city; large additions were made to the medical staff at the Health Office, and to the corps of inspectors; the Health office was kept open all night; a physician was appointed to examine lodging houses and the persons residing therein; a tent for the accommodation of smallpox patients, until they could be sent to the hospital, was established in Portsmouth square, and an ambulance stationed at the same place, with a physician in charge. All necessary funds were supplied by your Honorable Board and, in short, every possible endeavor was made to stop the progress of the disease.

In January there were 224 cases and 27 deaths. Large numbers of persons applied at the Health Office for vaccination, and the physicians were kept busily employed—from 500 to 1,000 persons being vaccinated there daily. As soon as a case of smallpox was reported the disease was first verified by the Health Officer in person, and the patient then sent to the hospital with his bed and bedding (which were afterwards destroyed); the house was then thoroughly fumigated and every one therein vaccinated; a house to house visitation was also made in the neighborhood and vaccination offered. Very few houses were quarantined during this epidemic, every effort being made to induce patients to go to the hospital where proper treatment would be rendered them and their families and neighbors freed from infection.

Power is granted the Health Officer by law to force persons afflicted with smallpox to go to the hospital, but he is seldom called upon to exercise it.

The hospital accommodations becoming insufficient, an addition was speedily built at a cost of \$7,561.37, giving room for 80 additional patients.

During February 115 cases occurred, and a large number of

Chinese affected with smallpox continuing to arrive by steamer from Hongkong, the Board of Health declared that place an infected port on February 28th, and all vessels thencefrom were ordered into quarantine for 15 days from the last chance of contagion on board or from arrival in port.

Owing to the large number of vaccinations and the precautions used, the material for the disease to feed upon gradually became exhausted, and the number of cases declined in March to 23. On March 16th the Board of Health declared smallpox to be no longer epidemic in this city, and the office staff was reduced to former proportions.

A few cases appeared in April and May, but many of them came from the country and the China steamers—the disease being nearly eradicated from the city.

On April 26th the steamer "Acapulco" arrived from Panama and reported having left 8 smallpox patients at Acapulco; the vessel was immediately quarantined and no cases can be traced to this source.

China, in fact, is a hot-bed of disease, and against infection from that country we must be continually on our guard. The Chinese never report cases of smallpox in the city and, usually, the finding of the dead body of some one who had died from the disease was the first intimation that a Chinaman was affected with smallpox. Forty five Chinese cases were landed from the steamers; for the care of these persons, however, at the hospital the steamship companies have always reimbursed the city at the rate of \$3 per man per day, and \$2,343 was thus collected and paid into the city treasury during the fiscal year.

Reliable vaccine matter has been very difficult to procure, all the brands seeming occasionally to lose their effect. At one time no virus could be obtained for several days, causing much dissatisfaction to those applying for vaccination. A State vaccine farm under the superintendence of the Board of Health, would be of great benefit to the State, and the expense would be slight. This office alone has paid \$7,526.80 for vaccine matter during the fiscal year—more than 80,000 vaccinations having been effected.

One great safety to the city during the recent prevalence of

### HEALTH REPORT.

smallpox has consisted in the admirable rule of the Board of Education requiring all children attending public schools to produce certificates of vaccination before admittance. I endeavored to carry into effect the order of the Board of Health to examine the children for vaccination marks. The visiting physicians were allowed to examine the children at some of the schools and a small percentage were found to be not vaccinated; a complete examination was prevented by the school authorities in spite of the protests of the Board of Health.

The cases of smallpox at the hospital were, on June 30th, reduced to 1, but I consider it necessary to maintain the hospital in a state of efficiency, exposed as this city is on all sides to the inroads of disease.

I quote from the annual report, 1887, of Dr. Oscar C. De Wolf, Commissioner of Health for Chicago: "Ten cases of small-"pox were brought to this city during 1887; these cases were so "promptly cared for and their surrounding neighbors and friends "so thoroughly protected by vaccination, that none of our citizens "suffered from the infection. During the past two years I have been charged several times with an unnecessary extravagance in heeping a smallpox hospital fully equipped with nurses, ambuflance, drivers, etc., when the disease was scarcely present; during these years a vaccinating corps has been constantly employed and urged to the utmost zeal in the performance of their work."

The following table will show the progress of the disease with the number of deaths:

	MONTHS.	Total Cases	Male	Female	White	Chinese	African	Deaths, White.	Deaths, Chinese	Total Deaths
1887—	-May	8	8	 	3	5				
	June	11	6	5	10	1		1	1	2
	July	9	6	3	9			3		3
	August	6	6	 	6			1		1
	September	6	4	2	6			1		1
	October	6	2	4	5	1		1	1	2
	November	33	20	13	31	2		2	2	4
	December	86	67	19	7	7		б	4	10
1888-	-January	224	190	34	193	30	1	21	6	27
	February	115	· 84	31	97	18		7	2	9
	March	23	20	3	20	3		3	1	4
	April	22	18	4	16	5	1	4		4
	May	8	5	3	8			2		2
	June	11	8	3	11					
		568	444	124	494	72	2	52	17	69

The cost of the smallpox epidemic to the city has been:

Expenses Twenty-sixth-street hospital for the fiscal year				\$20,199	99
Cost of addition to same				7,561	37
Health Office Expenses		\$40,243	05		
Salaries per Appropriation	\$18,000				
Expenses per Appropriation	5,000	23,000	00		
In excess of Appropriation			-	17,243	05
Total				.\$45,004	41

If the damage sustained by the merchants of this city by the loss of trade caused by the absence of travelers, and people from the country districts, through fear of the disease, and also the heavy additional expenses of the steamship companies, were added to this, it would amount to a large sum of money.

The only way of warding off another attack is by strict quarantine of infected vessels and by vaccination.

There are still in this city, no doubt, numbers of unprotected persons, and every endeavor must be made to reach them and induce them to get vaccinated.

### QUARANTINE.

Through the exertions of the Board of Health, particularly of Dr. Rosenstirn, the prime mover in the matter, a meeting of the city authorities, State Board of Health, Board of Trade, Board of Commerce and the representatives of the Federal Government in this city, was held on March 3d, and the strong resolutions then passed and forwarded to our representatives at Washington, were, I believe, one of the principal means of procuring the passage of Senator Stanford's bill providing for a quarantine station at this port. This bill, which has now received the President's signature, will be of great benefit to the commerce of this port. During the prevalence of smallpox the steamship companies, having no quarantine station at which to land passengers, were obliged to detain them on floating hulks at a great expense to themselves and inconvenience to the passengers. In one instance, several hundreds of Chinese were cooped up for more than a month on a hulk exposed to the ravages of both typhus fever and smallpox. On another occasion a quarantine ship was wrecked in the bay during a severe gale, the passengers barely escaping with their lives.

### DISINFECTION OF RAGS.

It having come to my notice that certain factories employed in the business of making mattresses, coverlets and other articles, were using uncleaned rags for the purpose, I reported the matter to the Board of Health, who at once insisted upon the cleaning and disinfection of these rags before use. A microscopical investigation of these rags was made; the result being that the germs discovered (on being cultivated) were found to be capable of producing infectious diseases.

Each factory has been notified to erect a steam disinfecting apparatus in accordance with a plan now being prepared; atten-

tion will also be paid to the condition of importations of articles manufactured from rags. In Chicago, the Commissioner of Health there informs me "that all rags designed for shoddy mattresses are submitted to steam heat in a close room or box, in which the temperature must reach 250° F.

### THE CHINESE.

The Hon. the Grand Jury, in their report, called the attention of the Board of Health to the condition of the Chinese quarter.

On February 21st, 1880, the Board of Health declared Chinatown a nuisance, and the Health Officer was ordered to abate it; the matter was brought up again November 15, 1880, and the Health Officer was asked what had been done in the premises. Dr. Meares, the Health Officer at that time, stated that it was impossible to do any more than had been done, and that without prison accommodation it was impossible to further abate this nuisance.

There is no doubt that through overcrowding, want of ventilation, and filth, many buildings in the Chinese quarter are unfit for human habitation and might by law be ordered vacated. The Board of Health are endeavoring to abate the nuisance, gradually, by ordering some of the worst places vacated; but, driving the Chinese out of one place simply makes them overcrowd another, and the nuisances have to be abated by degrees and with great judgment.

### GARBAGE.

At a special meeting of the Board of Health, held April 29th, 1887, amongst other sanitary regulations recommended by Dr. Perry and Dr. Clinton, a sanitary committee appointed at the previous meeting, is the following: "The construction of two dumping scows to carry garbage into the bay, which the committee consider an imperative necessity." The committee were requested to appear before the Board of Supervisors and solicit their co-operation. These gentlemen met the Health and Police Committee and discussed the matter fully with them. They described the enormity of the nuisance at the foot of Sixth and Seventh streets, the heaps of garbage and the stench arising

therefrom, making the neighborhood almost uninhabitable. They stated, also, the terrible result that would follow a visitation of cholera to this city, in which case the dumps would form an efficient breeding ground for the disease.

This occurred more than one year ago; objection was made to dumping the garbage in the bay, and nothing has been done in the matter; in fact, nothing can be done until an appropriation of money can be made for the purpose of getting rid of garbage by some other means than by dumping it on the public streets. There are two means of disposing of garbage in this city; either by dumping it into barges to be emptied outside the heads, or by cremation. The latter method is now being adopted in the large interior cities and has proved eminently successful, the only drawback being the cost of fuel. The health authorities at St. Pauls, Minn., after inspecting crematories in various places, have adopted them as the only efficient means of disposing of garbage. A crematory has been in successful operation in Chicago for some months, and in Montreal for several years.

We have, at a heavy expense, got rid of an epidemic of smallpox, and every effort should be made to place the city in a fit sanitary condition to resist the inroads of diphtheria, cholera and other diseases, which the pestilential condition of the dumps especially invites.

### LEPROSY.

In direct opposition to the laws governing this city, a leper of mixed German and Hawaiian parentage was landed here from the steamer "Australia," on the 12th of last June. In conjunction with the Quarantine Officer I used every means possible to prevent this, but Mr. Thornley, the State Commissioner of Emigration, acting under Section 2,955 of the Political Code, brought the leper ashore—The number of lepers in the Hawaiian Islands is estimated by the Board of Health there at 1,500, and the disease is spreading with great rapidity. Leprosy is undoubtedly contagious, and is one of the most loathsome diseases that afflicts humanity. I trust that at the approaching session of the Legislature an effort will be made to reconcile the conflict between the State laws and those of this city, and to give

us a general and stringent law protecting the country from this plague.

I may mention that in the last two years the Board of Health at Honolulu has expended more than \$250,000, the greater part of which was for expenses incurred on account of lepers.

### CATTLE.

Last February a band of diseased cattle were brought to this city from Fresno. The Market Inspector immediately placed them in an enclosure; I had them examined by a veterinary surgeon, and the cattle that were diseased separated from the others and slaughtered.

Many such diseased cattle are confiscated and ordered killed by the Market Inspector, but it is quite impossible for him to attend to his daily duties, which consist in watching for diseased cattle and calves in Butchertown and on the Mission Road, watching on the city front for arrivals by steamers, examining the city markets and butcher's stalls for diseased meat and, particularly, inspecting the meat and hogs in the Chinese quarter. There is, in fact, plenty of work for several market inspectors, especially as the examination of milk ought to be included in their duties.

### PLUMBING LAWS.

On April 30, 1888, a decision was rendered by Judge Wallace of the Superior Court, declaring the Act giving the Board of Health power to regulate the plumbing and drainage of buildings, "unconstitutional." He states: "The conclusion reached is, that the Act in question, being a local law, enacted in a case in which a general law might have been applicable, is, for that reason, unconstitutional."

The proper plumbing and drainage of buildings being an absolute sanitary necessity, an ordinance, giving the Board of Health power to regulate these matters, was drawn up by the City and County Attorney, and incorporated by your Honorable Board in the laws governing the city. A large majority of the masters and journeyman-plumbers were desirous of seeing this ordinance become law, and there will be now no difficulty in enforcing the regulations passed by the Board of Health on the subject.

### SEWERS.

Since my appointment as Health Officer I have recommended, through the Street Department, the sewering of twenty-four streets, and have to thank Mr. Ashworth, the Superintendent of Streets, for his able co-operation and energy in having most of these recommendations complied with.

Mr. S. Harrison Smith, City and County Surveyor, has fully and ably treated the subject of sewering the city in a proper manner, and has also drawn a plan and made an estimate of the cost. It is a matter of the greatest importance to the welfare of the people of San Francisco, and I can only express a hope that steps will be taken to improve the present system of sewerage in accordance with some well established plan and uniform grade.

The main sewers have been well flushed and are in good condition, and the Board of Health are using what powers they have to get the small streets sewered and connections made with the dwelling houses.

### DISINTERMENTS.

The collections for disinterment permits during the year amounted to \$10,720. The money is paid into the city treasury, and is not available for the use of this department.

The salary of the Inspector of Vaults and Disinterments is, however, paid out of this fund, and his services are of great use in attending to the sanitary condition of the cemeteries.

The Health Inspectors for the six districts report to me.

Report Resident Physician Twenty-sixth-street Hospital.

Mortuary tables Nos. 1 to 18.

Secretary's Financial Report.

Market Inspector's Report.

Inspector of Plumbing and Drainage.

List of Master and Journeyman Plumbers.

Mr. James J. Byrne, Assistant Inspector of Plumbing and Drainage, reports having inspected during the year 35,330 feet of iron-stone pipe, and 16,105 feet of cast-iron pipe laid as house drains, also, having examined 640 traps set under sidewalk.

I am greatly indebted to the United States Signal Service for their kindness in furnishing this office with monthly Meterological and Barometrical observations, also to Chief of Police Crowley for his assistance on all necessary occasions.

I am, gentlemen, yours respectfully,

D. E. BARGER, M.D.,

Health Officer City and County of San Francisco.

# REPORT OF PLUMBING AND DRAINAGE INSPECTOR.

SAN FRANCISCO, July 1, 1888.

To D. E. Barger, M. D.,

Health Officer City and County of San Francisco:

Sir: I herewith present the following report as Inspector of Plumbing and Drainage for the fiscal year ending June 30, 1888.

I have issued permits for plumbing and drainage for nine hundred and seventy-one (971) buildings.

I have received seven hundred and fifty-nine (759) plans showing the plumbing and drainage of nine hundred and seventy-one (971) buildings.

I have made eight hundred and seventy-five (875) first inspections, and eight hundred and thirty-two (832) final inspections.

The following classification will show the purpose for which the buildings were erected:

Private residences	465
Apartment houses for two families (flats)	175
Apartment houses for three families (flats).	37
Apartment houses for four families	7
Apartment houses for six families	2
Apartment houses for eight families	2
Factories	6
Public schools	4
Churches	5
Boarding houses or hotels	10
Laundries	1
Stores	7
Stores and dwellings.	106
Stores and warehouses	18
Stores and hall	
Stores and offices	10
Stores and lodging houses	
Offices,	5
Stables	4
Hospitals	4
Theatres	1
Public bath house,	1
Warehouses	5
Engine houses	9
Cable railroad depot	9
Public halfs	6
College	1
Alterations and additions to old buildings	
Total	-

Yours respectfully,

J. E. SWEENEY,

971

Inspector of Plumbing and Drainage.

# REPORT OF TWENTY-SIXTH STREET HOSPITAL.

SAN FRANCISCO, July 1, 1888.

D. E. BARGER, M. D.,

Health Officer.

Sir: I herewith submit my report of matters pertaining to the Twenty-sixth Street Hospital for the fiscal year closing 30th of June, 1888.

### SMALL-POX,

There were thirteen cases of small-pox on hand July 1, 1887.

Admitted from that date to June 30, 1888, five hundred and twelve cases, giving as the whole number treated, five hundred and twenty-five.

Of these four hundred and sixty-seven have been discharged cured, fortythree have died of the disease, four have escaped, and eleven remain on hand.

The death rate has been 8.18 per cent.

TABLE 1.

TYPE.	NUMBER OF CASES.	DEATHS.	PER CENT, OF DEATHS.
Varioloid	112		
Variold, discreet	319	15	4.70
Variold, confluent	60	13	21.66
Variold, hemorrhagic (black)	21	15	74.

TABLE 2.

AGES.	NUMBER OF CASES.	DEATHS.	PER CENT. OF DEATHS.
Under five years	28	 5	17.08
Between five and ten years	24	2	8.33
Between ten and twenty years	189	9	4.70
Between thirty and forty years	99	10	10.1
Between forty and fifty years	59	6	10.1
Between fifty and sixty years	25	5	20,
Between sixty and seventy years	17	2	11.76

TABLE 3.

NATIVITY.	NO. OF CASES.	NATIVITY.	NO. OF CASES.	
United States. China. China. Germany. England. Ireland. Canada Denmark. Sweeden. France Italy. Scotland. Mexico. Norway.	26 22 10 9 9 8 7 7	Cape Verde Island. Alsace. Austria. Po and Tahiti. Centrai America. Alaska. West Indies Finland. Belgium. Holland. Sandwich Islands.	5 3 3 2 1 1 1 1 1	

### LEPROSY.

There were on hand on the 1st of July, 1887, three cases of leprosy.

Remained during the fiscal year closing June 30, 1888, three cases. Whole number treated during the fiscal year, six.

Of these two have died, one escaped, and three remain on hand.

Three are natives of the Sandwich Islands, one of China, one of Japan, and one of the United States, who contracted the disease in the Sandwich Islands.

One case of secondary syphilis was admitted and discharged cured.

During the month of January I was ably assisted in the discharge of my duties by Dr. S. S. Herrick, now of the Health Office.

From January 20th to May 1st, Dr. George F. Bradbury, now in the Quarantine service, was Superintendent.

J. E. PELHAM, M. D., Resident Physician.

# REPORT OF QUARANTINE OFFICER.

San Francisco, June 30, 1888.

D. E. BARGER, M. D.,

Health Officer City and County of San Francisco:

Sir: I have the honor to submit the following report for the fiscal year ending June 30, 1888:

Thirty-two vessels were placed in quarantine during the year, and forty-two cases of small-pox were removed to the Twenty-sixth Street Hospital. Thirteen persons afficited with typhus fever were sent from the steamship City of Peking to the quarantine hulk Shenandoah for treatment.

During the past year cholera has been epidemic in South America, extending as far north on the Pacific side as the northern boundaries of Chiti.

A resolution passed by the Honorable Board of Health required a quarantine, thorough inspection and fumigation, of all vessels hailing from cholera-infected ports of South America. This order has been obeyed, and on the arrival of vessels from these ports, they have been placed in quarantine, and every precaution taken to prevent the introduction of cholera into this port.

The following shows number of vessels that entered this port during the fiscal year subject to quarantine fees, the amount received and receipts.

YEAR.	MONTH.	NO. OF VESSELS.	DUES.	RECEIPTS.
1887	July,	55	\$362.50	\$362.50

# MARKET INSPECTOR'S REPORT.

San Francisco, July 1, 1888.

To D. E. Barger, M. D.,

Health Officer of the City and County of San Francisco:

DEAR SIR: I have the honor to report that my predecessor, from July 1, 1887, to March 31, 1888, reports the following as the result of his efforts as Market Inspector, taken from the books of the Health Office, viz:

Fifteen thousand and fifty (15,050) lbs. beef. Twelve hundred and fifty (1,250) lbs. mutton. Thirteen hundred and fifty (1,350) lbs. pork. Four (4) hogs.
Eighty-three (83) sheep.
Six hundred and thirty-eight (638) calves. Two '2) cows.
Thirty-eight (38) cattle.
Seven (7) deer.

Seven thousand nine hundred (7,900) lbs. fish. Five hundred (500) lbs. bacon.
Sixty-eight (68) chickens.
Five hundred and forty (540) wild ducks.
Five hundred (500) Eastern turke's.
One hundred and fifty (150) wild hare.
One hundred and fifty (150) Eastern hams.
One hundred and fifty six (156) wild geese.
Forty-eight (43) dozen quail.

During my term of office, commencing April 1, 1888, to close with the fiscal year ending June 30, 1888, I respectfully present the following as the confiscations made, viz:

Five thousand and fifty (5,050) lbs. beef. Four Thousand three hundred (4,300) lbs. pork. Six (6) sheep. One hundred and fifty-six (156) calves. Eighteen (18) hogs. Three (3) cows.

In addition to my duties as Market Inspector, I have received fifteen complaints of horses suffering from glanders, fourteen of which were deprived of life, and one, upon examination, was found not to be suffering from that disease.

Very respectfully,

HUGH CRUMMEY,

Market Inspector,

# CITY PHYSICIAN'S REPORT.

Office of the City Physician, San Francisco, August, 1888.

To the Honorable the Board of Supervisors

Of the City and County of San Francisco:

Gentlemen: In compliance with resolution No. 786 (Third Series), I have the honor to submit to your consideration my twelfth annual report for the fiscal year ending June 30, 1888.

The County Jail has maintained a very good sanitary condition for the past year. Only one case of small-pox has occurred, and an outbreak of an epidemic was prevented by repeated vaccination of the inmates, and thoroughly fumigating, disinfecting, cleaning and whitewashing the institution. The predominant diseases were rheumatism, bronchitis, pneumonia (of which one died), syphilis and gonorrhea.

The number of indigent sick applying daily at my office is about the same as last year.

The number of autopsies made for the Coroner has increased (95 last year to 116 this year).

In the interest of the public I have hereofore called the attention of your Honorable Body to some very urgent needs of the city, which necessarily come under my observation as City Physician. Your Board has long considered the necessity of removing the City Receiving Hospital to more agreeable and sunny quarters. This change is certainly desirable, and this decided benefit will be welcomed by the people who understand the urgent necessity that impelled such action.

In this connection I beg leave to call your attention to another

improvement that would render our hospital service more effective at little cost to the municipality.

I refer to the much-needed ambulance service. We rank among the largest cities of the Union, yet cities of less size have such a service. I recommend that in the establishment of this service at least one well-appointed ambulance should be located near the City Receiving Hospital, to be in readiness to respond This ambulance to be provided with an Ambulance Surgeon, who for that purpose should be in constant attendance at the City Receiving Hospital, under direction of the Police Surgeon. The Ambulance Surgeon to be appointed like the internes of the City and County Hospital, and serve without compensation; and when on duty, to be recognized by the words "Ambulance Surgeon" printed on the band of his cap. In case of an accident, provision could be made for notifying the police officer on the beat, whose duty it should be to at once telephone to the City Receiving Hospital for the ambulance, which, provided with driver, surgeon, and all appliances for temporary dressings of emergency cases, could immediately proceed to the scene of accident. The ambulance to be provided with a gong-bell, the sound of which should be recognized by the police authorities as commanding right of way over everything on the streets, except the fire engines. In case of very large fires, the ambulance should go to the fire, report to the Chief of the department in command, and remain until the danger of accidents is thought to have passed.

The reasons for my recommendations will be apparent, when you consider that much harm is often done to injured persons by careless handling of would-be kind friends. Particularly does this obtain in the case of fractures, when limbs are often much damaged by untrained handling and rough riding. Hemorrhage is frequently promoted, sometimes to a fatal issue, which might be controlled and life saved by the intelligent care of a surgeon promptly on the ground.

The number of patients treated in the City Receiving Hospital during the last year was 4,698, as compared with 2,709 for the previous year, an increase of nearly 2,000 in one year, and with the rapid growth of the city and the great spread of the cable

roads over such a vast territory, means a proportion of increase of work for the succeeding year.
Cases attended in the County Jail       1,445         Cases attended indigent sick       2,378         Cases attended in City Receiving Hospital       4,698         Vaccination in County Jail       390         Vaccination in office       580
Total9,491
Sent from County Jail to the City and County Hospital. 3 Sent from County Jail to the Pest House. 1 Sent from County Jail before Commissioners of Insanity 3 Died in County Jail. 2 Executed in County Jail. 2 Autopsies made for the Coroner 116
Very respectfully,
CHAS. BLACH, M. D.,
City Physician and Police Surgeon.
AUTOPSIES MADE FROM JULY 1, 1887, TO JUNE 30, 1888.

Amount paid into City and County Treasury	\$48,286 73	

The appropriation for Alms-House expenses for 1887 and 1888 was \$80,-000. The amount paid out from the City and County Treasury was \$71,-813 94; consequently there was a surplus of \$8,186 06 remaining at the close of the fiscal year.

All the inmates, both male and female, who were able to work, have been employed, as usual; their labor being utilized wherever it could be made most useful. Not more than one-third of the inmates recently admitted are capable of performing manual labor.

The male inmates have been employed on the farm, on the roads, in the gardens and grounds, buildings, stables, etc. Others have been working as painters, whitewashers, carpenters, herders, milkers, etc. The female inmates have done all the sewing required by the institution, making and repairing their own and the male inmates' clothing, while others have been kept busy at general house-cleaning, etc.

The sanitary condition of the three buildings has received constant and careful attention, the sewers have been flushed weekly, disinfectants freely used, and every portion of the buildings kept sweet and clean.

The roads in the neighborhood have been kept in good repair, also the buildings, fences, etc.

A great deal of work has been done on the grounds of the new building, giving them a pleasing and sightly appearance.

The crops on the farm have been a fair average this season, both as regards quantity and quality. Our supply of milk has been ample, from which a large portion of the butter used in the institution has been made.

Nothing requiring special comment has occurred during the year, everything having worked smoothly and pleasantly.

During the fiscal year 1887 and 1888 I have received from the State under the "Act to appropriate money for support of aged persons in indigent circumstances" the sum of \$45,806 28. I have also received from the State, under the "Act to appropriate money for support of orphan, half-orphan, and abandoned children," \$2,480 45, or a total of \$48,286 73. This amount has been duly paid into the City and County Treasury. The total amount received from the State of California under these two Acts, to this date, is \$136,892 90, thus relieving the tax-payers of the city and county of San Francisco to that amount on account of Alms-House expenses.

The Auditor's figures give the amount paid out of the City and County Treasury for 1887 and 1888 for Alms-House expenses, as \$71,813 94; deducting therefrom the amount I have returned to said treasury, received from sales of Alms-House property, viz: \$1,181 35, and \$48,286 73 received from the State, the actual disbursement from the City and County Treasury on account of the Alms House has been \$22,345 86.

Religious services at the institution have been held as usual, and my thanks are due to the Rev. Father Brennan and the Priesthood of Mission Dolores Church for their unremitting attention to the Catholic portion of the inmates.

My thanks are also tendered to the Rev. A. D. Drummond, Assistant Rector of the Church of the Advent, and the Rev. E. J. Lion, Pastor of St. Stephen's Church; also, to the Rev. James Campbell and the ladies of the Young Women's Christian Association, for their devotion to those of the Protestant faith.

To other kind friends who have made donations of reading matter for use of the inmates, I tender my sincere acknowledgements.

My thanks are also eminently due to all who helped to contribute so bountiful a supply of toys and candy for the Alms-House children at Christmas, at the same time assuring them that their kindness was duly appreciated by the recipients of their bounty.

From the opening of the Alms-House to the present time 10,404 inmates have been admitted, and provided with a comfortable home through the generous charity of the people of the city and county of San Francisco.

Sincerely thanking your Honorable Body, and the Hospital Committee of the Honorable Board of Supervisors, for your and their kind co-operation and support, this report is most respectfully submitted.

M. J. KEATING.

Superintendant City and County Alms House. San Francisco, July 1, 1888.
